

What do they THINK AND FEEL?

what really counts
major preoccupations
worries & aspirations

Satisfy the
customer needs.

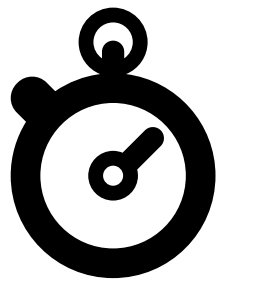

Treating the
customers in a
friendly manner.

Production loss
and even loss of
money

Location tracking
facility is needed for
quick product delivery.

the convenience
of shopping at
home .save time
and efforts

Inventory
management system
reaches it peak level
during the period of
quarantine.

What do they SEE?

environment
friends
what the market offers

It reduces the
physical or manual
work of customers.

It act as
intermediate
between
production unit
and customers

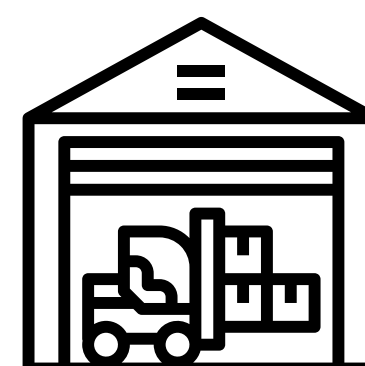

Customer and
retailer both can
track the
products .

Quickly track stock
shortages and excess stock
Auto-adjust stock from
invoices and purchase
orders

Can store and
distribute variety of
products to
customers.

According to the
customers need,
customised products
were delivered.

What do they SAY AND DO?

attitude in public
appearance
behavior towards others

According to the
customers need,
customised products
were delivered.

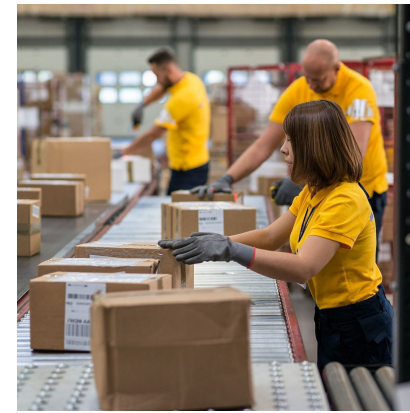

It requires
large space for
storing the
stocks

Used in business
to business
purpose.

Treating the
customers in a
friendly manner.

maintains the all
import and export
informations

What do they HEAR?

what friends say
what boss say
what influencers say

shipping, storing,
import fees, duties,
taxes and other
expenses associated
with transporting and
buying inventory.

PAIN

fears
frustrations
obstacles

One of the most common
issues of robust inventory
management is two-fold :
overselling of a product
and running out of the
inventory.

customer demand
is an ever changing
mode ,so keeping
lot of stocks leads
to obsolete
inventory.

software would
make sure to
minimize human
intervention in the
process it would
reduce errors.

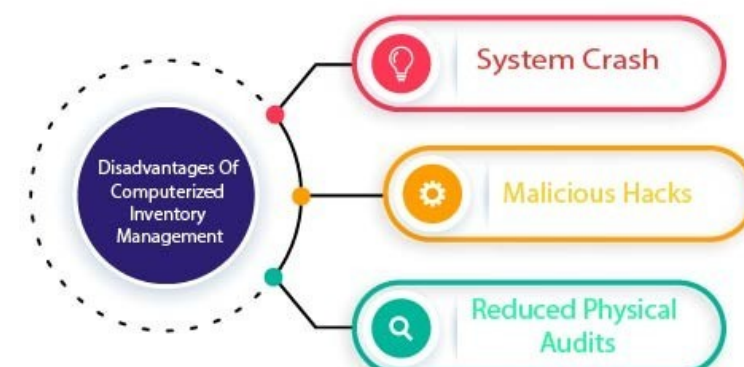

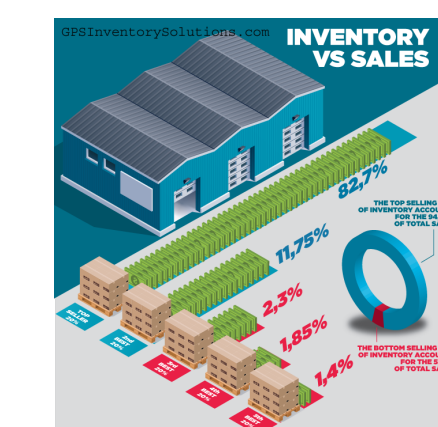

GAIN

"wants" / needs
measures of success
obstacles

Software would
not only help you
save time,but it
would also help
you to reduce
costs.

Can give 360 degree
items information
anytime which can
improves
transparency

The retail inventory
management
software can
automatically count
the items in your
warehouse with
better accuracy

You should have
transparency around
what amount of
inventory you have.To
enable this,it is
important that you
get a complete set of
data from multiple
sources on an "as it
happens" basis.
